5% Fat Modification of AIN93G Rodent Diet

A reduced fat modification of the semi-pure diet formulation AIN93G. Some modifications have been made to the original formulation to suit locally available raw materials.

- A small reduction in fat content from 7% to 5% is the only modification
- This has resulted in a 2% reduction in calculated energy.

Diet Form and Features
<ul style="list-style-type: none"> • Semi pure diet. 12 mm diameter pellets. • Pack size 5 Kg, vacuum packed in oxygen impermeable plastic bags, under nitrogen. Bags are packed into cardboard cartons to protect them during transit. Smaller pack quantity on request. • Diet suitable for irradiation but not suitable for autoclave. • Lead time 2 weeks for non-irradiation or 4 weeks for irradiation.

Calculated data uses information from typical raw material composition. **Diet post treatment by irradiation or autoclave could change these parameters.** It could be expected that individual batches of diet will vary from this figure. We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
