

## Diet SF12-040

## Non Auto Florescent Modification of AIN93G

A semi-pure diet formulation for laboratory rats and mice based on AIN-93G. This formulation satisfies the nutritional requirements for growth of rats and mice. Some modifications have been made to the original formulation to suit locally available raw materials.

- Cellulose has been excluded from this ration
- Wheat starch has been increased to make up the balance
- This diet has been shown not to be auto florescent. Please contact Specialty Feeds for more details.

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or auto clave could change these parameters.** We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
