

Diet SF03-002

36% Fat Modification of AIN93G (59% of Total Energy From Fats)

A very high fat semi-pure diet formulation for laboratory rats and mice based on AIN-93G.

- Total fat content has been increased to 36% fat. Using generally recognised energy data this would equate to a diet where 59% of total energy is from lipids.
- The fats included to make up the total fat content have been chosen to maximise diet palatability whilst retaining a good spread of fatty acids. All known fatty acid requirements have been met or exceeded.
- We would recommend that this diet be transported and stored at less than 15°C. At higher temperatures the diet softens considerably.
- Calculated digestible energy has increased as a result of the increased fat inclusion.
- Dietary carbohydrate content is from sucrose only. All starch has been removed from the diet. This has been done primarily to improve pellet strength but may also have some physiological implications.

Calculated Nutritional Parameters

Protein	19.40%
Total Fat	36.00%
Crude Fibre	4.70%
AD Fibre	4.70%
Digestible Energy	22.8 MJ / Kg
% Total calculated digestible energy from lipids	59.00%
% Total calculated digestible energy from protein	15.00%

Diet Form and Features

- Semi pure diet. 15mm x 20mm block to mimic similar size of pellet.
- Packed in plastic trays. Trays packed in groups of five (5). with layer of glad wrap between each to protect diet.
- Vacuum packed under nitrogen in oxygen impermeable bags. Packed in cardboard cartons for protection during transit.
- Diet must be stored at or below 15°C
- Diet not suitable for irradiation or autoclave
- Lead time 2 weeks

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or auto clave could change these parameters.**

We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
