## Soya Free Rat and Mouse: Reformulated

A fixed formulation diet for laboratory rodents of all ages, based on our standard rat and mouse diet but free of soya meal and lupins.

- This diet was designed to reduce phytoestrogen content. Gas chromatography – Mass spectrophotometry analysis indicates a range of phytosterols are present, however in bioassays the activity is very low or not detectable.
- Although several research groups have been using the diet for some time as a low phytoestrogen diet, care must be taken in contemplating the use of this diet as completely free of phytosterols activity.
- To be confident of a truly phytosterols free diet we recommend the semi-pure diet AIN93G.

### Calculated Nutritional Parameters

Protein	18.50%
Total Fat	5.00%
Crude Fibre	3.40%
Digestible Energy	14.3 MJ / Kg
% Total calculated digestible energy from protein	23.40%
% Total calculated digestible energy from lipids	15.00%

### Diet Form and Features

- Cereal grain base diet. 12 mm diameter pellets.
- Light green in colour.
- Pack size 5 Kg, vacuum packed under nitrogen in oxygen impermeable plastic bags. Bags are packed into cardboard cartons to protect them during transit. Smaller pack quantity on request.
- Diet suitable for irradiation, also suitable for autoclave.
- Lead time 2 weeks for non-irradiation or 4 weeks for irradiation.

### Ingredients

A fixed formulation ration using the following ingredients:

Wheat, Mill mix, Fish meal, Refined Canola oil, Dicalcium phosphate, Lime sand, Salt, Methionine and a Vitamin and trace mineral premix.

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or auto clave could change these parameters.**

We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
