

## Diet SF07-021

## Modified AIN93G Rodent Diet 7% Fish Oil \*\*\*No Longer in Production

A semi-pure diet formulation for laboratory rats and mice based on AIN-93G. This formulation satisfies the nutritional requirements for growth of rats and mice. Some modifications have been made to the original formulation to suit locally available raw materials.

- In this modification Canola oil has been replaced with fish oil.
- Please note that this diet is no longer in production. Please see data sheet for SF07-081 for replacement diet.

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or auto clamp could change these parameters.** We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
