Modified AIN93G Rodent Diet 24.5% Energy From Corn Oil

A semi-pure diet formulation for laboratory rats and mice based on AIN-93G.

- Corn oil content has been increased and starch content reduced accordingly.
- Oxicap E2 has been used as antioxidant.

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or autoclave could change these parameters.** We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
