Gluten Free Rat and Mouse: High Fat

A cereal grain based diet formulated for laboratory rats and mice. This diet satisfies the nutritional requirements for growth of rats and mice. Modification of SF08-025

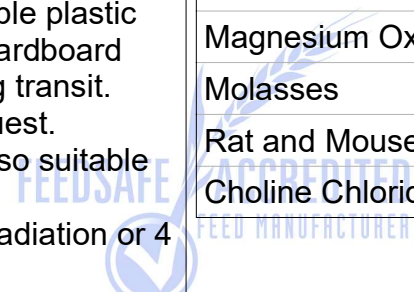

- Fat content has been increased to 9%.
- Molasses content has been reduced to 2%.
- Rice flour reduced to allow for increase in fat content.
- This diet is based on a formulation supplied by the Victorian Institute of Animal Health.
- Some modifications have been made to suit locally available raw materials

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post irradiation or autoclave could change these parameters.** We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by

Specialty Feeds.
