

## Diet **36% Fat Semi Pure Rodent Diet** **SF10-087 (58% of Total Energy From Fats)**

A very high fat semi-pure diet formulation for laboratory rats and mice equivalent to Bio-Serv High Fat Diet

- Total fat content has been increased to 36% fat. Using generally recognised energy data this would equate to a diet where 58% of total energy is from lipids.
- Some modifications have been to the original formulation to suit locally available raw materials
- We would recommend that this diet be transported and stored at less than 15°C. At higher temperatures the diet softens considerably.
- Dietary carbohydrate content is from sucrose and dextrose only.

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or autoclave could change these parameters.** We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
