

## Diet 21% Fat, 0.15% Cholesterol Semi-Pure Rodent Diet

A semi-pure high fat diet formulation for laboratory rats and mice based formulated to mimic a "Western fast food diet". This diet was originally formulated to be similar to *Harlan Teklad* TD88137 or *Research Diets* Western Diet D12079B. Some modifications have been made to the original formulation to suit locally available raw materials.

• This Diet was developed to generate arteriosclerotic lesions in a range of susceptible mice strains.

Calculated data uses information from typical raw material composition. Diet post treatment by irradiation or autoclave could change these parameters. It could be expected that individual batches of diet will vary from this figure. We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
