

## Diet **SF04-057**      **6% Fat Semi-Pure Rodent Diet: Control for SF00-219**

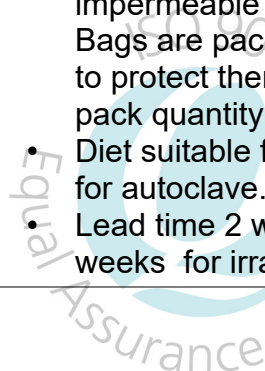

This diet was designed to be a control for SF00-219.

- Total fat content has been reduced from 22% to 6%.
- The lipid source has changed from Ghee to Canola oil. This was done to maintain the known requirements of some individual fatty acids.
- Starch content was increased to match the removal of Ghee.

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or autoclave could change these parameters.** We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
