

Diet **High Fat Rodent Diet Based on D12492** **SF16-048** **Extra Vitamins For Irradiation**

A semi-pure very high fat diet formulation for laboratory rats and mice based on Research Diets D12492. Some modifications have been made to the original formulation to suit locally available raw materials.

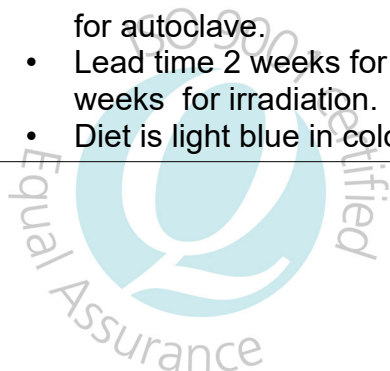

- We have evidence that vitamin losses and other changes to the diet can occur during irradiation at 25K Gy. Vitamin levels have been increased to account for the expected losses.

Diet Form and Features

- Semi pure diet. 12 mm diam pellet.
- Vacuum packed in 2 Kg cardboard trays in oxygen impermeable bags. Packed in cardboard cartons for protection during transit.
- Diet must be stored at or below 15°C
- Diet suitable for irradiation but not suitable for autoclave.
- Lead time 2 weeks for non-irradiation or 4 weeks for irradiation.
- Diet is light blue in colour

Calculated data uses information from typical raw material composition. It could be expected that individual batches of diet will vary from this figure. **Diet post treatment by irradiation or autoclave could change these parameters.** We are happy to provide full calculated nutritional information for all of our products, however we would like to emphasise that these diets have been specifically designed for manufacture by Specialty Feeds.
